DATALOGGER FOR HUMIDITY AND TEMPERATURE

HygroLog HL-NT

THE INTELLIGENT DATA LOGGER.
INTRODUCING AIRCHIP DIGITAL TECHNOLOGY.

INNOVATION IN HUMIDITY AND TEMPERATURE MEASUREMENT

- FDA CFR 21 Part 11 / GAMP 4 compliance
- Outstanding accuracy and long-term stability
- Unlimited memory with Flash Card
- Display of measured values
- Interchangeable sensors for humidity and temperature
- Large range of probes
- User-friendly, validated HW4 software

The HygroLog NT series is the latest development in data loggers for relative humidity, temperature and dew point. Thanks to the precision of the new AirChip3000 technology on which they are based, the instruments achieve a degree of accuracy not seen before.

The new HygroLog NT series not only fulfils all FDA and GAMP requirements, but also supports users in validation. With a storage capacity of more than 47,000 data points, the loggers have a virtually unlimited memory. Measurement losses are ruled out by the digital communication interface between the HygroClip2 probe and the loggers.

Flexible choice of probe
- Can use all HygroClip2-compatible probes
- HygroLog HL-NT3 with possibility to connect two additional external probes
- Probes changed in just seconds

Functional display
- Display of data on a clear, backlit graphic display with trend indicator
- Optional display and keyboard for measurement display, status display, operation, adjustment and view of logged data

FDA CFR 21 Part 11 and GAMP4 compliance
- Recording of all events such as battery changes, user actions and memory-card changes

Optional docking station
- Can be used as lockable mechanical holder
- Possible to connect four additional probes
- Monitoring of the digital switch inputs

AirChip3000
- Compensates humidity and temperature over 30,000 reference points
- 2,000 data point memory
- Dew/frost point calculation
- Sensor auto-diagnostics and automatic correction
- Active alarming and information
- ASIC (Application Specific Integrated Circuit), micro-controller and EEPROM on one chip
APPLICATIONS.

The data loggers in the HL-NT series are ideal for all application where data and events need to be tracked precisely (GAMP or FDA), e.g. the food and pharmaceutical industries, printing and paper industries, meteorology, agricultural sector, archaeology, climatology, etc. There is hardly a field today in which these parameters may be ignored.

HygroLog HL-NT2
Logger for interchangeable probe

HygroLog HL-NT3
Logger for interchangeable probe as well as two external sensors

Range of different docking stations

PROBES FOR HYGROLOG HL-NT.

Whether you need a simple climate probe for measuring ambient conditions or a more sophisticated cable probe for high temperature and other special applications, we can provide you with the ideal HygroClip2 probe to suit your requirements. All HygroClip2 probes can be individually calibrated and adjusted to increase measurement precision where you need it the most. This capability is what makes every probe in the product range a high-end solution for your application.

Standard climate probes
Probes with maximum accuracy, for all climatic measurements, operating range -50...100 °C, 0...100 %rh

High temperature probes
Hand-held probes for applications to 200 °C
Probe length 250 and 400 mm Ø15 mm

Miniature probes
4 and 5 mm probes for measurements in confined spaces such as packaging etc. and for building material tests

Industrial probe
For fixed mounting
Operating range 0...100 %rh, -100...200 °C / 0...400 bar

An up-to-date overview of our extensive range of accessories such as cables, filters, sets, software and calibration equipment as well as further information on the HygroLog is available on our web site www.rotronic.com.
**TECHNICAL INFORMATION.**

**Data logging.**
Keep track of the past. The stored values can be displayed graphically with the optional HW4 software. You can define the saving intervals, alarm limits, type of alarm and much more yourself, meaning the HygroLog can be integrated in any application you like.

**Adjustment.**
There are three different adjustment profiles for measurement accuracy available as options. With the top version the instrument is adjusted at 20 humidity values and three different temperatures. A further advantage of this version: the data are stored on the AirChip and can therefore be used for audits.

**Sensor diagnostics.**
The intelligence of AirChip3000 technology enables advanced sensor diagnostics. Should the sensors deviate from factory defined parameters, the measured values are compensated electronically. You can select whether the values are to be compensated and whether an alarm is to be given.

**Measurement range**

- Accuracy at 23°C with integrated HC2-S standard probe: Max. ±1.5 %rh / 0.2 K with SCS certificate

**Probes**
HygroClip2 & Pt100 probes (docking station)

**Data saving interval**
5 seconds to 24 hours

**Memory mode**
Start/Stop/Continuous/Text with timestamp

**Alarm indicators**
Visual indicators (LED, two-color) and beeper

**Logger dimensions**
156 x 109 x 42 mm

**Housing material**
ABS

**Probe protection**
Protective cap and probe-specific filter

**Power supply (recommended)**
9 V battery ≥ 500 mAhr or externally via docking station

**Battery life**
1 year (with 1 HygroClip2 probe, 15 min. data saving interval, without display)

**Display (optional)**
LCD full graphic display

**Logger weight**
Approx. 300 g

**Data storage**

- Storage medium: 32 MB Flash Card (up to 1 GB possible)
- Storage capacity in text mode: With 32 MB Flash Card 800,000 data points
- Storage capacity in protected mode: With 32 MB Flash Card 1,504,000 data points

**Functions**

- Event logging: All user actions, alarms, programming
- Audit trail: Full FDA CFR 21 Part 11 / GAMP4 compliance
- Adjustment: Probe adjustment in instrument possible
- Access to instrument (PC): Via docking station

**Docking stations**

- Connections: AC adapter, RS232, RS485, USB via docking station (depending on model)
- IP protection / Anti-theft device: IP65 / Integrated in docking station
- Dimensions/Weight: 113 x 70 x 39 mm, ca. 175 g / NT-Desk 145 x 140 x 125 mm, ca. 350 g

**System requirements HW4**

- Processor: Pentium 1 GHz
- RAM: 512 MB
- Monitor: SVGA, 1024 x 768, 256 colours, 96 DPI
- Hardisk: HW4: 50 MB / NET2: 280 MB
- Software: Standard: HW4-E / Professional: HW4-P

**Subject to technical change without notice. Errors and omissions excepted.**
